Product description:

- Inner layer is very soft and skin-friendly
- Meltblown layers made of fine fibers provide a relevant barrier against harmful particles and effective filtration
- Outer layer provides a necessary structure and protection against solid and liquid particles

- Medical face mask Type IIR (EN14683:2019) are intended for use by medical professionals in medical facilities and operating rooms to protect the entire work environment
- The masks are made multilayer pleated non-woven material, which is hygienically welded with ultrasound
- High wearing comfort is due to the elastic ear loops, which fix the mask behind the ears and through anatomically adjustable nose clamp
- The face mask is to be used with the folding outside and the nose-bridge should always be above the nose (see picture above)
- Medical product Class I acc. to 93/42 EEC
- CE-marking
